Student Satisfaction Survey for A.Y. 2021-2022

With the aid of a Google form that was created in accordance with the instructions and whose link was disseminated among the students, our college conducts a survey of student satisfaction to ascertain their opinions and perspectives on the institution, the teaching and learning process, the infrastructure, and other topics. Objective-style questions were posed. This poll received 827 responses from students, whose opinions were gathered, organised, assessed, and summarised.

The teaching staff has gained recognition from the students. Many have appreciated that teachers used examples and applications to illustrate concepts, how institutions offer remedial classes, and how teachers use student-centered techniques like experiential learning, participatory learning, and problem-based learning to improve learning experiences. Students are encouraged by their teachers to express and discuss their doubts in class. The teacher's approach to teaching and fairness in evaluation have received praise from the students. The majority of students were pleased with the syllabus covered and the teachers' teaching methods.

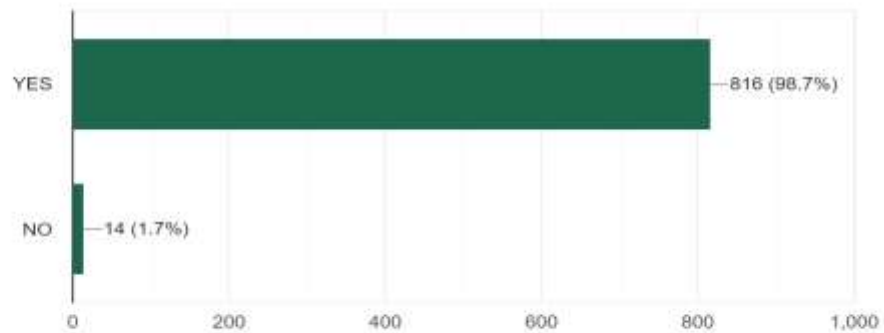

They also noted their happiness with the college's teaching halls and audio-visual amenities, as well as the building's eco-friendly infrastructure, which brought them closer to nature.

The study of the results reveals that the vast majority of students have a favourable opinion of the facilities offered by the institution. We also noticed certain remarks that will aid us in developing certain areas of our self.

The following displays the survey's findings as a bar graph and a pie chart.

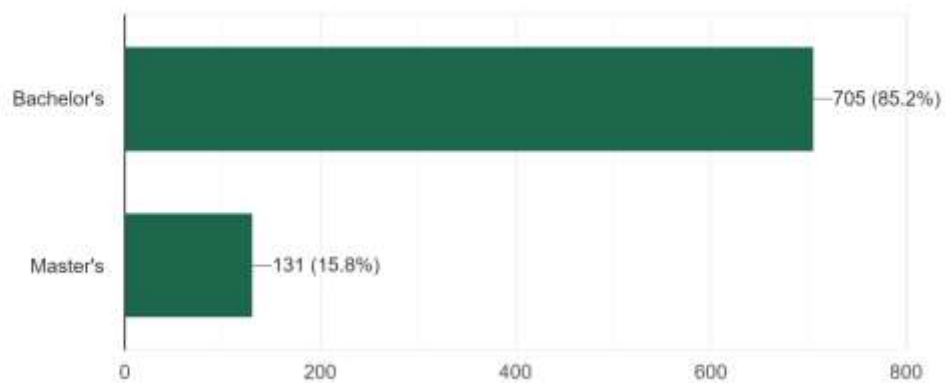

Please confirm this is the first and only time you answer this survey.
